

FLOOR CASSETTE STATION

FLOOR CASSETTE STATION

The Panels Plus Floor Cassette Station is designed to hold joists in a square position for fastening decking. Dimensional lumber, I-joists, and open web floor truss configurations are all compatible with this floor cassette table.

The Floor Cassette Station consists of a clamping table with color-coded joist locators that can be spaced based on the customers' needs. When the floor cassette is completed, the floor cassette can be raised up on pop-up conveyors and either manually rolled out or picked up by an overhead crane.

The Floor Cassette Station is developed at a lower working height, so fall protection is not required when fastening decking.

Clamping Table

Joists Placed on Table

Footswitch & Push-Button Controls

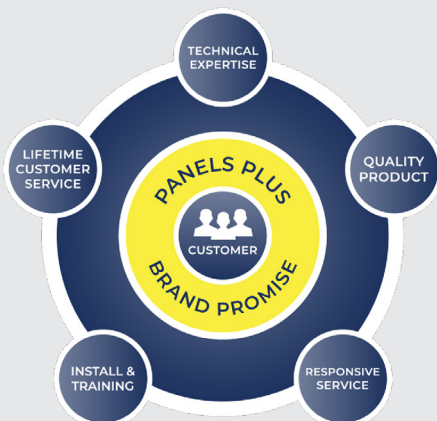

Color-Coded Joist Locators

Benefits

- Holds floor cassettes square
- Floor cassettes pop up on completion and can be rolled out or picked up with a crane

Features

- Clamping Table
- Telescoping Side
- Joist Locators
- Squaring Edge
- Footswitch & Push-Button Controls
- Pop-up Conveyors
