

# LIGHT GAUGE STEEL FRAMING STATION

# LIGHT GAUGE STEEL FRAMING STATION

The Light Gauge Steel Framing Station consists of a steel framing table and two screw tool carriages. The steel framing table holds the cold-formed steel C channels and tracks squarely in place for fastening.

One screw tool carriage is attached to each side of the steel framing table. Each screw tool carriage holds two screw tools (sold separately). This semi-automated system inserts a screw into the top and bottom of the track and into the studs via push-button controls. The screw tool carriages eliminate the need to fasten steel wall panels by hand.

The Panels Plus panelized wall panel systems are more ergonomic than traditional construction methods and are developed at an ergonomic working height. This eliminates the need to continually kneel or hunch over to build wall panels – improving employee health and safety.

**Framing Table with Screw Tool Carriage**

**Screw Tool Carriage**  
*\*Tool not included*

**Light Gauge Steel Framing Station**

**Push-Button Controls**

## Benefits

- Ergonomic working height
- Improved squareness vs. traditional methods
- Superior steel wall panel consistency

## Features

- Framing Table
- Screw Tool Carriages (2)
- Stationary Side
- Telescoping Side
- Squaring Edge
- Squaring Stops
- Footswitch & Push-Button Controls
- Pop-up Conveyors

## The Panels Plus Promise

We promise to support our customers for as long as they own Panels Plus equipment. Whether you're a startup plant and need technical expertise, or you're seasoned in the industry and are planning to integrate equipment into your existing lines, Panels Plus will be here to help ensure your success.

- Technical Expertise & Assistance
- Installation & Training
- Customer Support
