

# LIGHT GAUGE STEEL SHEATHING STATION

# LIGHT GAUGE STEEL SHEATHING STATION

The Light Gauge Steel Sheathing Station offers flexibility in wall height and sheathing thickness. Screw spacing is preset. This specialized Sheathing Station screws sheathing to steel wall panels. The Steel Sheathing Station is equipped with a squaring table and multitool steel sheathing bridge.

The multitool sheathing bridge is equipped with a handheld control pendant that assists with moving the bridge to the next screw placement. There is also a hand crank wheel for fine-tune movement. The multitool sheathing bridge uses electric screw tools to screw sheathing to the steel wall panels at preset fastener spacing (screw tools not included).

The Panels Plus panelized wall panel systems are more ergonomic than traditional construction methods and are developed at an ergonomic working height. This eliminates the need to continually kneel or hunch over to build wall panels – improving employee health and safety.

**Multitool Sheathing Bridge**

**Electric Screw Tools**

*\*Tool not included*

**Footswitch**

**Handheld Control Pendant**

## Benefits

- Ergonomic working height
- Single person operation
- Flexibility with fastener spacing
- Fastens consistently and accurately

## Features

- Squaring Table
- Multitool Sheathing Bridge
  - Electric Screw Tool Mounts
  - Handheld Control Pendant
  - Hand Crank Wheel
  - Touchscreen
- Stationary Side
- Telescoping Side
- Squaring Edge
- Footswitch & Push-Button Controls
- Horizontal Rollers

## The Panels Plus Promise

We promise to support our customers for as long as they own Panels Plus equipment. Whether you're a startup plant and need technical expertise, or you're seasoned in the industry and are planning to integrate equipment into your existing lines, Panels Plus will be here to help ensure your success.

- Technical Expertise & Assistance
- Installation & Training
- Customer Support
