

PNEUMATIC TILT TABLE

PNEUMATIC TILT TABLE

The Pneumatic Tilt Table allows operators to easily access both sides of the wall panel. It offers an ergonomic design that pneumatically tilts the panel for easy access to either side of the wall panel. The Tilt Table is compatible with both wood and light-gauge steel wall panels.

With single person operation, the Tilt Table pneumatically lifts the wall panel from lying flat to a 75-degree angle. It also provides the ability to easily access all sides of the wall panel, including the backside. This allows the operator to inspect the wall panel or to install horizontal blocking.

Fully Tilted Table

Pneumatic Lift Cylinders

Benefits

- Ergonomic design
- Single person operation
- Provides working access to either side of wall panel

Features

- Pneumatic Lift Cylinders
- Moveable Work Pedestal
- Horizontal Rollers

Moveable Work Pedestal
